## Form III – Registration Application for Dogs Registered with Other Registries:

Purebred Australian Shepherds registered with other registries may be eligible for ASCA registration provided that all of the following requirements are met:

- 1) The dog was registered as an Australian Shepherd in the country of birth with another registry recognized by ASCA that has met one of the following requirements:
  - a) Any registry with which ASCA has a reciprocal agreement (i.e. The Canadian Kennel Club)
  - b) Any other club registry approved by the ASCA Board of Directors after review of the registry's registration process (currently the American Kennel Club, The Kennel Club)
- 2) Owners of applicant dogs registered with non-ASCA approved registries must seek approval for that registry by providing the ASCA Board of Directors with clear evidence of the other registry's ability to accurately verify purebred Australian Shepherd lineage.
- 3) If both parents of an applicant dog are ASCA registered, the dog must be registered through an ASCA Litter registration application by the breeder. **This dog is NOT eligible for this type of registration.**
- 4) Litters born prior to the registration of a sire/dam will be eligible for litter registration (after registration of said parent) provided both parents are ASCA registered and the litter meets all other requirements in the ASCA registry rules for litter registration (DNA, Fees, etc).
- 5) Registration of any applicant dog, its parents or its grandparents with any registry as a breed other than an Australian Shepherd will result in the applicant dog being ineligible for registration in the ASCA Registry.
- 6) The application form is accompanied by a minimum three generation pedigree certified by the other registry and must include all registration numbers from that registry.
- 7) The applicant must provide evidence that the applicant dog's lineage is based 100% on ASCA registered dogs, none of whose registrations have been revoked by ASCA prior to the applicant's purchase of the dog or who was ASCA registered "Not for Breeding". Registration of any applicant dog or any dog in the submitted pedigree as a breed other than Australian Shepherd will result in the applicant dog being ineligible for ASCA registration. Applicants must supply ASCA descendant registration numbers at the time of application.
- 8) The application form is accompanied by a photocopy of the registration papers certified by the other registry. The dog must have an unrestricted (for breeding) registration with that registry if applying for registration as "for breeding" in the ASCA Registry. This does not apply to applicant dogs applying to the ASCA registry as an Altered dog.
- 9) The ASCA application and the other registry registration must show identical ownership.
- 10) The dog must have permanent, readable microchip or tattoo identification.
- 11) The dog must be DNA profiled with an official ASCA DNA laboratory.
- 12) The owner must certify that the applicant dog does not have any disqualifying faults as described in the ASCA breed standard.
- 13) The signature of all owners must appear on the application.
- 14) The Breeder's signature must appear on the application
- 15) Three photos are required of the individual dog and must accompany the application form. Photos must be clear, color and show the dog's front, left and right side full body view.
